PROFIL

A Software Engineering student with a strong interest in UI/UX Design and Front-End Development. Highly motivated to learn, develop skills, and contribute to the company.

EDUCATION

SMK-IT ASSYIFA

Major: Software Engineering

EXPERIENCE

Big Proyek

Simple Travel Website (2024)

- Developed a dynamic web application using Laravel and PostgreSQL for a school assignment. Successfully implemented key features such as a secure login system, CRUD (Create, Read, Update, Delete) for efficient data management, and QR code functionality. This project demonstrated expertise in backend logic, database connectivity, and responsive front-end design.

Cassier Coffe (2025)

- This mobile application was developed using Flutter and integrated with Firebase for authentication and database management, as well as external APIs for data retrieval. The app includes several key features such as user login & registration, CRUD functionality, and responsive UI design. This project was created as part of a school assignment.

Re-Design Website E-commerce (2025)

- This website redesign project was created using Figma, focusing on improving the user interface and overall user experience. The design includes interactive prototypes with simple and user-friendly animations to enhance usability and visual appeal. This project was developed as part of the ISAC UI/UX Design Competition organized by Airlangga University.
